

Images needed for Inner Line Permit for Arunachal Pradesh

--- Ramana Athreya

Good Example:

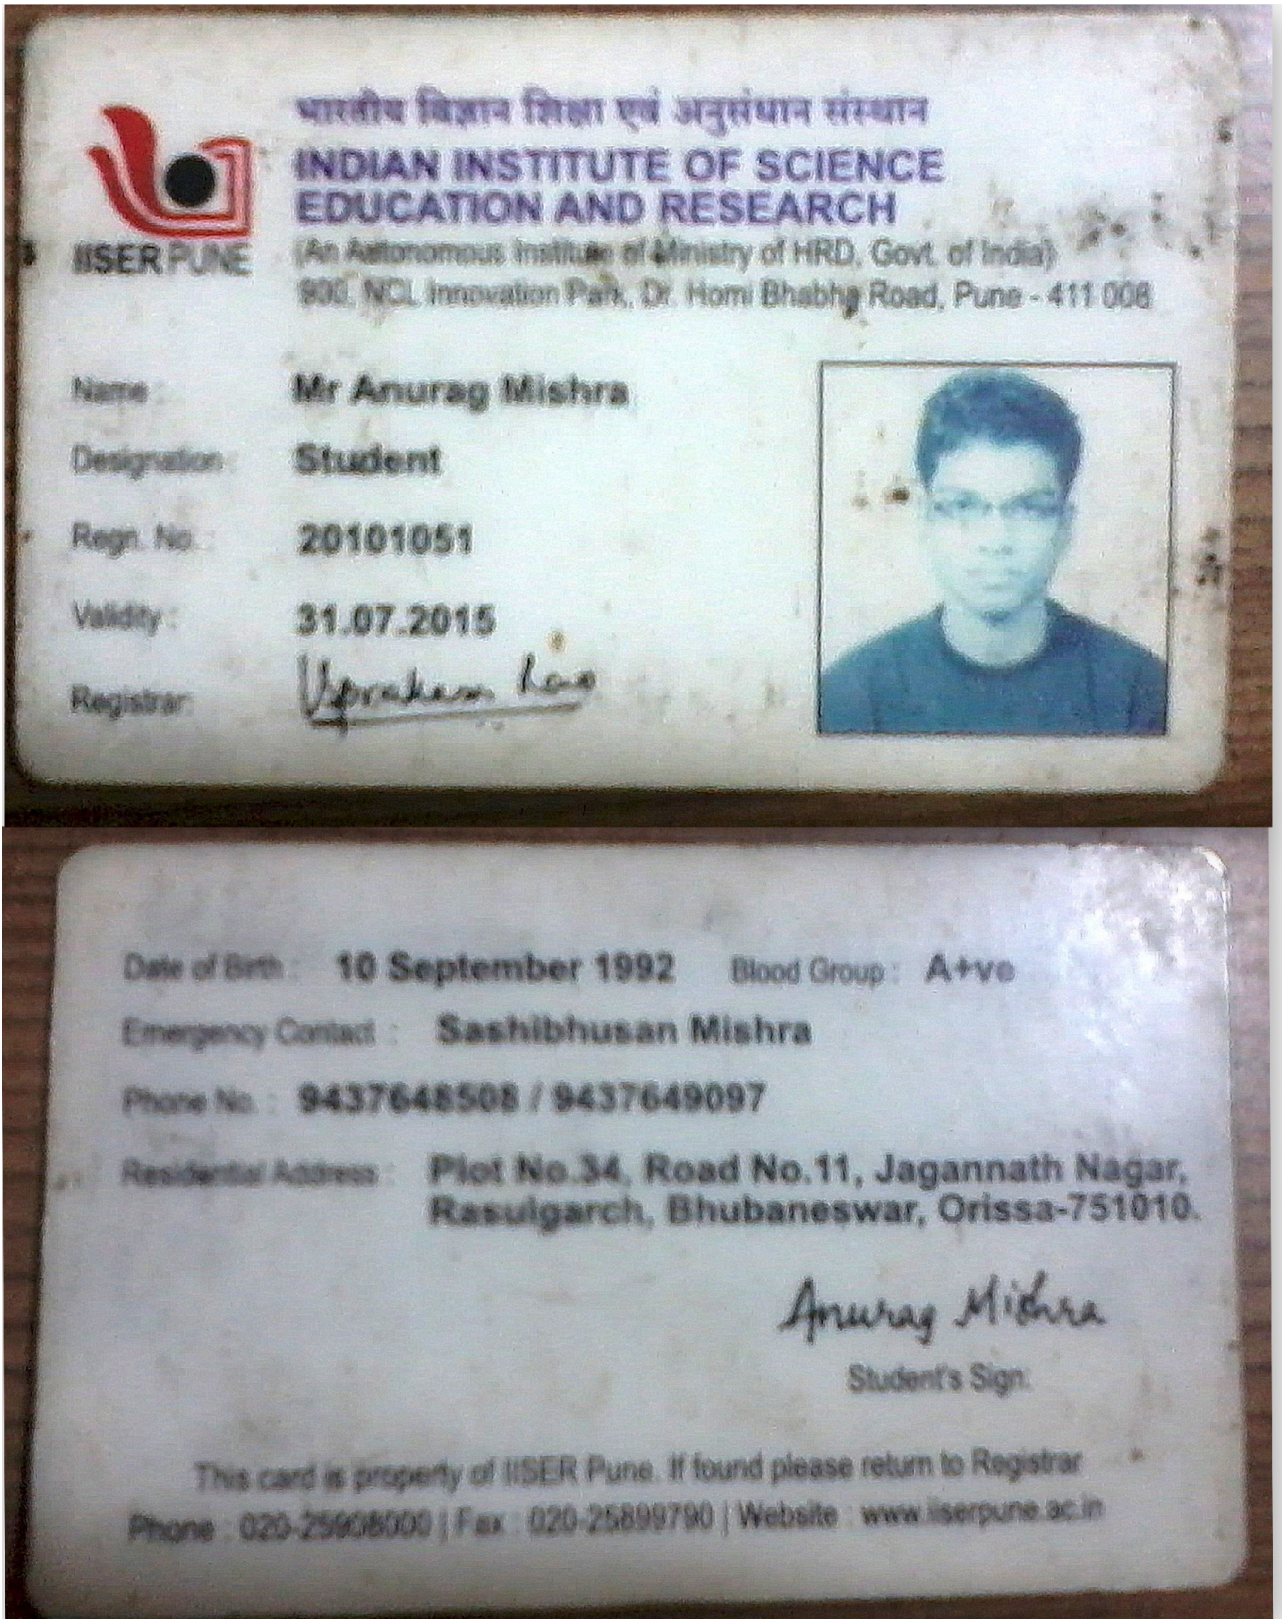

- Clear image with good focus, good exposure, no flash highlights
- the sides are aligned
- background has been completely trimmed – which will not waste
- size of the image is 435 x 705 pixels which is perfect since at 150 dpi it will print 7.5 x 12 cm image
- filesizes are about 100 kb which will not stress slow networks in remote areas where the files have to be emailed for obtaining the permit
- Both sides have been included which provides the photo id, and the address

Bad examples

1. Very poor focus, barely legible, flash highlights and too many pixels (1709 x 2137 pixels; 1 Mb)

A typical photo id of size 9 x 6 cm must have pixel dimensions of about 540 x 360
This will give an adequate quality printout of a lifesize image at 150 dpi

2. Very poor use of space with a small image area amidst a large useless background

3. Has an address but no indication of whom the address belongs to.

This image did not come with the other side of the card which would have taken care of it.
