About ICTP

Founded in 1964, the Abdus Salam International Centre for Theoretical Physics (ICTP) operates under the aegis of two United Nations Agencies: UNESCO and IAEA and is regularized by a seat agreement with the Government of Italy.

Italy is providing most of ICTP's funding.

ICTP's mission

- Foster the growth of advanced studies and research in physics and mathematics, especially among researchers from developing countries;
- Provide an international forum for the exchange of information and ideas among scientists from the North and South;
- Maintain excellent research facilities for visitors, associates and fellows, principally from developing countries, who participate in the Centre's research and training activities.
